

THE COMPLETE WALKTHROUGH · COLLECT & PAYMENT LINKS

One link. Any amount. Money in your account.

A real, end-to-end run-through of GateOne Collect — a shareable payment link that needs no wizard and no approval. Build it, share it, get paid. Featuring a full product sale: "BUY SHOES" by FINNEY VENTURES.

PREPARED FOR

Organizers & agents

GateOne Collect · Walkthrough · July 2026

Donations · invoices · product sales · flat 7%

THE ROUTE

No wizard. No approval. Just a link.

01 The Collect workspace

02 The link form

03 Build a product sale

04 Publish & share

05 What payers see & buy

06 Confirmed & the money

+ Proof: school fees

+ Proof: church giving

How Collect differs from Ticketing & Voting

There's no setup wizard and no platform approval — a link goes live the moment you publish (you just need a verified payout account for the currency). GateOne keeps a flat **7%**; the card fee is yours to absorb or pass to the payer.

1

THE COLLECT WORKSPACE

Where your payment links live.

Open **Collect** from the left. Every link you make — a donation page, an invoice, a product sale — lives here as a card. Hit **New link** to start.

COLLECT

+ New link

Payment links

Request money — donations, fundraising, offerings, invoices. One link, any amount.

No payment links yet

Create a link to collect money — share it anywhere, no account needed to pay.

+ New link

Empty to start. "Payment links — request money: donations, fundraising, offerings, invoices. One link, any amount."

2

THE LINK FORM

Three cards, and you tune the wording.

The basics, how much, and options. The defaults suit a donation — but this form flexes into a fixed charge, preset tiers, or a full product catalog.

< Collect

New payment link

Request money — set the amount, share the link, get paid to your payout account.

The basics

What you're collecting for.

Title

Building Fund

Description

Tell people what this is for...

Cover image

Thank-you message

Bless you!

Button label

Contribute

The pay button. e.g. "Pay fees", "Donate". Blank = "Contribute".

Word for one payment

contribution

Used in the copy: "Recent contributions". Blank = "contribution".

Custom fields

+ Add field

Save as draft

Publish & go live

Going live needs a verified payout account for GHS.

Options & wording. Anonymity, a "leave a message" toggle, a thank-you message — and the tailor-made copy: **Button label** (the pay button; blank = "Contribute") and **Word for one payment** (blank = "contribution"). Add custom fields too. **Save as draft** or **Publish & go live**.

Make it sound like you

"Contribute / contribution" is the default. For a sale you'd set the button to **Buy**, for an invoice **Pay**, for dues **Pay fees** — and the whole page follows suit.

3

BUILD A PRODUCT SALE

Sell items, priced from your list.

Let's make a real one — **BUY SHOES** by FINNEY VENTURES. Pick **Products**, list what you sell, pass the card fee to the buyer, and set the wording to "Buy".

The basics

What you're collecting for.

Title

BUY SHOES

GHS 0.00 raised 0 BUYs

No BUYs yet.

EDIT LINK

The basics

What you're collecting for.

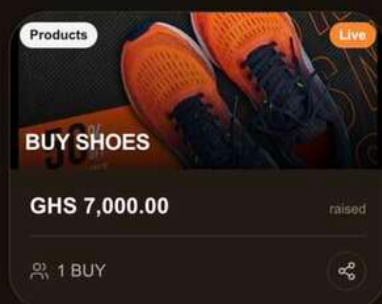

The link is live. **BUY SHOES · Active**, a share QR + link (/c/buy-shoes-...), Pause / Close, and a **BUYs** panel (empty for now). The whole form stays editable below.

COLLECT

Payment links

Request money — donations, fundraising, offerings, invoices. One link, any amount.

+ New link

Back in the workspace. The link now shows as a card — **Products · Live · GHS 7,000 raised · 1 BUY** — with its cover and a one-tap share.

A clean storefront — no account.

Anyone who opens the link lands on a themed page with your cover, picks items and quantities, and pays. The total updates live, card fee included.

BUYs

GHS 7,000.00 raised **1** BUYs

When	Name	Amount	Your net	Status
Jul 18, 2026, 8:17 PM	Charles Opoku-Agyemang	GHS 7,000.00	GHS 6,510.00	Confirmed

Your ledger. **GHS 7,000 raised · 1 BUY** — Charles Opoku-Agyemang, amount GHS 7,000, **Your net GHS 6,510** (GateOne's flat 7% = GHS 490), **Confirmed**. Money settles to your payout account on your terms.

That's the whole loop

Make a link → choose a mode (any amount, fixed, tiers, or products) → tailor the wording → publish → share. Payers buy with no account, receipts go out automatically, and your net lands in the ledger and your payout account.

Now bill school fees.

To prove the point: the exact same three cards become a **fees/invoice** page. Set a **Fixed** amount, make it **Expiring** (a payment window), and change the wording to “Fees” — and the whole page reads like a bill, not a donation.

1 BUY

Four links, four jobs. A church **offering** (Any amount · "1 GIVING"), **school fees** (Fixed · "1 SCHOOL FEES"), a **fundraiser** (goal · "1 contribution"), and a **product sale** (Products · "1 BUY") — one builder, one 7%.

Any money job, one builder

Product sale, crowdfunding goal, fixed fee, or Sunday offering — it's the same link, the same three cards, and the same 7%. If you can name it, you can collect it.

END TO END

The whole thing, in one line.

Any amount, any reason.

Products today, a donation or an invoice tomorrow — same link builder, same three cards. That completes the paid trio: Ticketing, Voting, and Collect.
