

THE COMPLETE WALKTHROUGH · CROWDFUNDING

Set a goal. Share the link. Watch it fill.

A real, end-to-end run-through of a fundraising campaign on GateOne Collect — a goal, a progress bar, and anonymous giving. Featuring a live cause: "Fund raising to help Rita."

05 Your ledger

It's a Collect link with a Goal

Crowdfunding is the same payment link you use for donations and sales — you just pick **Any amount** + the **Goal** link type, and a progress bar appears. No wizard, no approval; it's live the moment you publish.

1

SET UP THE CAMPAIGN

A cause, a target, a deadline.

Name the cause and add a cover that tells the story. Then set **Any amount** so supporters give what they can, pick the **Goal** link type, and enter your target.

< Collect

New payment link

Request money — set the amount, share the link, get paid to your payout account.

2

THE PUBLIC PAGE

The progress bar tells the story.

Anyone who opens the link sees the cover, the cause, and a **progress bar** — how much is raised of the goal — then an open amount field and a one-tap give.

THE BAR MOVES

Momentum, in real time.

The public page updates instantly — the bar ticks up and the wall credits the giver (or keeps them anonymous). That visible momentum is what pulls the next gift in.

YOUR LEDGER

You see the total; the giver stays private.

In the link's ledger you see the campaign total and each contribution — but an anonymous gift hides its name *and* amount even from you, exactly as promised on the public page.
